THINK: 2002 THINK NEIGHBOR

ISSUE

The TH!NK Neighbor requires a different type of key than other Ford, Lincoln, and Mercury vehicles. Accessory kits which will allow TH!NK dealers to duplicate TH!NK Neighbor keys on existing Rotunda key duplication equipment have been released. Key blanks are also available through Rotunda.

ACTION

TH!NK dealers should investigate purchasing the appropriate accessory kit and key blanks. Refer to the following Service Information for details.

SERVICE INFORMATION

TH!NK Neighbor key codes are stamped on the key and end with the letter "R". Key codes for vehicles may be retrieved from QCDEALER.COM.

Dealers are encouraged to record the key code on the sales jacket for further reference. The glove box, hood and deck lids, and drive mode selector switch on the TH!NK Neighbor are keyed identically.

Both machines will cut by code with these new adapters for the TH!NK neighbors.

Key Machine Information	
Rotunda Number	Description
011-00215	Exacta Key Machine Base Only
011-00270	TH!NK Neighbor AE Exacta Accessory Kit
