

Attachment "D" – Trademarks

CURRENT FORD VCM

EARLY – BUILT FORD VCM

NON – FORD VCM

- Rotunda OE VCM displays a full color oval. Some of the non-genuine units use a flat blue color, and the letter 'F' is incorrect. Note the distinct difference of the four letters within the Ford Blue Oval between the genuine and counterfeit VCM's.
- Some non-genuine VCM's contain a Lincoln 'star' not centered.
- The Rotunda OE VCM Mercury logo on early-built units is a white background with red lines, while the current units have a black background with white lines. Some of the non-genuine versions use a white background with black lines.
